 SLA based management

Meet your business objectives by safely outsourcing your business-critical IT

Jitscale Wrap Up

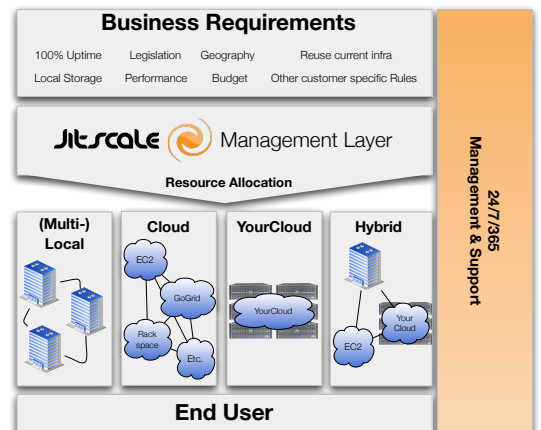

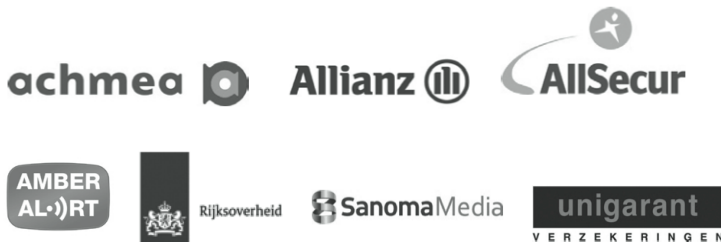

Jitscale's approach

Any technical implementation is driven by a business need. Availability, security and performance all influence your business, and in many cases your revenue as well. At Jitscale we specialize in facilitating the alignment between IT & the business. Our award winning architects and engineers will design, implement, migrate and support your platform, ensuring you exceed both the client experience and business expectations.

What can Jitscale do for me?

With a completely agnostic view of technology and infrastructure Jitscale will implement and manage a fully scalable, tailor made platform. Jitscale will support your infrastructure, operating systems, database-clusters and application-layers, all based on a price per hour and your usage. Your requirements and our services will be defined in an SLA to be used as a frame of reference, upon which we will continuously strive to outperform on all services delivered.

Other Jitscale Customers
